DETAILED ACTION

Drawings

- 1. The original drawings were received on April 3, 2006. These drawings are acceptable.
- 2. The replacement drawings were received on January 31, 2007. These drawings are not acceptable. These drawings have been withdrawn and cancelled by Applicant in letter dated February 9, 2007.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- Claims 1 and 2 are rejected as failing to define the invention in the manner required by 35U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure, which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. Note the format of the claims in the patent(s) cited.

An examples of said language is: two kinds of windings different in induced voltage.

The kind of winding is not specified. Also, according to the claim language, two windings of the same kind can provide different induced voltage values according to it's number of turns.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over U.S. Patent No. 3,483,463 to O. J. M. Smith.
- O. J. M. Smith clearly teaches the construction of a system and method for alternating current machines, and apparatus therefor comprising:

an electric power generating apparatus (Figure 1) for dispersed power supply, which rectifies an alternating current output of a permanent magnet type electric power generator (1) driven by an aircraft engine or turbine to provide a direct current output; wherein said permanent magnet type electric power generator comprises:

two kinds of windings different in induced voltage (Figure 6); and an alternating current output from one winding of said two kinds producing a higher induced voltage is rectified through a saturated reactor connected in series (Figure 14), whose inductance value becomes smaller with an increase in electric current, while an alternating current output from the other

winding of the two kinds producing a lower induced voltage is directly rectified, and these rectified outputs being connected in parallel (Figure 5).

An electric power generator being driven by a windmill or a waterwheel is a statement of use, which is not positively recited on the claim. The alternating current machine disclosed by O. J. M. Smith can be easily powered by a windmill or waterwheel.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pedro J. Cuevas whose telephone number is (571) 272-2021. The examiner can normally be reached on M-F from 8:30 - 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schuberg can be reached on (571) 272-2044. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
